AI SDK

- Manual tiling mechanism, balance the utility between multi-level cache & processing-engines.
- Out-standing performance & low-power consumption tuning. Improve performance to 1.4X faster and reduce 50% extra power consumption in custom's key feature, and make a distinct advantage over competitors.

Platform inference framework development.

- VPU backend development.
- Optimize platform inference flow, reduce sw overheads and resolve critical paths. Implement caching mechanism to reduce pre-processing at every frame, reduce 90% of inference sw-overheads.
- Framework memory management optimization, refine buffer allocate strategy reducing 30% model loading time.

Custom support - key feature landing.
